

I knew full well what this sheet was intended for, but let's face it It's just not big enough to express how Dr. Terry has helped myself and my loved ones. I'm saying my mother, sister, sons, grandson and daughter in law. I want you to know that you are so professional and caring and you are that way with everyone. There just aren't words to describe Dr. Terry.

I remember thinking I had a brain tumor and was all ready to get a cat scan but turned the other way and came to your office. I think it was the only time I was ever reserved about my problem and decided to see what you said. Your comment was does the top of your head feel like it's going to explode? How perfect was that for sitting on my fill of old, but haven't carried one since.

My neck always felt like it had been slashed with a butter knife and was an open sore, but you knew I didn't have equal weight on my feet.

There isn't anything Dr. Terry doesn't know about me unless it's how well I like to pay my bills. I was so please about your card it took me to tears on Craig's birthday 12-21-07. You need to realize I didn't even know I owed you anything.

You mentioned in my Christmas card about being part of my health team, but you are the team.

If there was one thing I'd like to do it would be "Do something for Dr. Terry". It simply amazes me how you always know what's wrong with me and everyone you see. I really don't know how you do what you do, but it has to be a wonderful feeling. You also knew if I'd have known I owed you money you wouldn't have gotten by with forgiving a balance of mine or any full I instigated. However I'm very thankful and wouldn't try to repay what you wanted to and for whatever reason. I'm closing saying I thank God I know Dr. Terry because there has not and will not be anyone like Dr. Terry.
